Please **ADD** the following new claims.

31. **(NEW)** A method comprising:

- receiving a plurality of items from a customer, each item having a bar code;
- scanning the bar code on each of the plurality of items;
- selecting an integer from a plurality of integers based on one of the scanned bar codes;
- determining a price of a subset of the plurality of items, the subset not including the item corresponding to the one of the scanned bar codes;
- determining a rounded price based on the price and the selected integer, in which the rounded price is a lowest multiple of the selected integer that is greater than the price;
- charging the customer the rounded price for the plurality of items; and
- receiving payment of the rounded price from the customer.
